HIGH PERFORMANCE COATING SYSTEM

ROOF

		GOOD PERFORMANCE	HIGH PERFORMANCE	EXCELLENT PERFORMANCE
***CONCRETE ROOF TILES**	PRIMER	Nippon Roof Primer	Nippon Acrylic 5170 Wall Sealer	Nippon EA9 Finish HB
	TOP COAT	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline and weathering resistance. It is available in Gloss and Soft Matt Finish. It can also be used for internal walls.		**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.
PRE-COATED ROOF	PRIMER	Nippon Zinc Chromate Primer	Nippon 8048 (Indian Red 1462)	
	TOP COAT	**Nippon Protective Finish FD** Finishing coating suitable for pre-coated roof **OR** **Nippon Automotive Refinish** High quality synthetic enamel with variety of colours suitable for pre-coated roof.	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline and weathering resistance. It is available in Gloss and Soft Matt Finish. It can also be used for internal walls.	**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.
GALVANISED ROOF OR ZINCALUME SURFACE	PRIMER	Nippon Etching Primer 120 or Nippon Galvaprimer	Nippon EA9 Finish HB	
	TOP COAT	**Nippon Protective Finish FD** Finishing coating for steel and wood structure.	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline and weathering resistance. It is available in Gloss and Soft Matt Finish. It can also be used for internal walls.	**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.

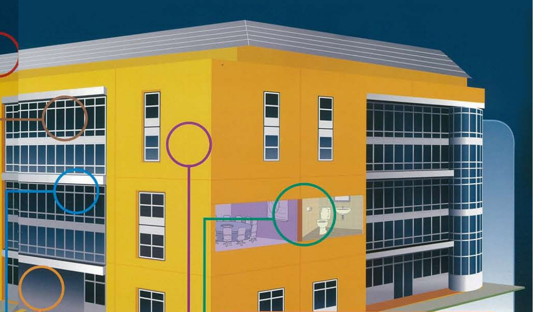
** Disclaimer : The recommended painting system for concrete roof tile is for pitched roof. As for flat roof, "Excellent Performance" painting system is highly recommended.*

WOOD

		GOOD PERFORMANCE	HIGH PERFORMANCE	EXCELLENT PERFORMANCE
	PRIMER	Nippon 9000 Aluminium Wood Primer		**Nippon 1Pack PU Timbercoat** Varnish for wood surface, parquet flooring, furniture and wood paneling. • Fast dry. • Anti-scratch. • Prevent water penetration. • Weathering resistant.
	INTERMEDIATE	Nippon 9000 Undercoat		
	TOP COAT	**Nippon NC Wood Lacquer** High gloss lacquer for wood furniture and billboard industries. • Fast dry. • For decoration and protection of proper primed wood. • Interior use only.	**Nippon Protective Finish FD** High Gloss finishing coating for wood structure.	

METAL

		GOOD PERFORMANCE	HIGH PERFORMANCE	EXCELLENT PERFORMANCE
EXTERNAL	PRIMER	Nippon Zinc Chromate Primer		Nippon 8048 (Indian Red 1462)
	TOP COAT	**Nippon Protective Finish FD** Finishing coating for steel structure and iron surfaces under non immersion condition.	**Nippon MIO** Alkd-based coating pigmented with micaceous iron oxide. Being resistant to atmospheric pollution, high humidity and mild chemical fume attack.	**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.
	SELF-CLEANING CLEAR COAT			**Nippon CrystaCoat** Self-cleaning clear coat with excellent resistance against dirt streak mark. It helps to keep walls cleaner and longer.
INTERNAL	PRIMER	Nippon Zinc Chromate Primer		Nippon 8048 (Indian Red 1462)
	TOP COAT	**Nippon Protective Finish FD** Finishing coating for steel structure and iron surfaces under non immersion condition.	**Nippon MIO** Alkd-based coating pigmented with micaceous iron oxide. Being resistant to atmospheric pollution, high humidity and mild chemical fume attack.	**Nippon EA4 Finish EP** High performance coating for internal flooring, steel and glazed tile. Provides good resistance to abrasion, chemical and mechanical damage.
GALVANISED STEEL	PRIMER	Nippon Etching Primer 120 or Nippon Galvaprimer		Nippon EA9 Finish HB
	TOP COAT	**Nippon Protective Finish FD** Finishing coating for steel structure and iron surfaces under non immersion condition.	**Nippon MIO** Alkd-based coating pigmented with micaceous iron oxide. Being resistant to atmospheric pollution, high humidity and mild chemical fume attack.	**Nippon Polyurethane Recoatable Finish (Exterior Use)** High performance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish. **OR** **Nippon EA4 Finish (Interior use)** High performance coating for steel. Provides good resistance to abrasion and mechanical damage.
	SELF-CLEANING CLEAR COAT			**Nippon CrystaCoat** Self-cleaning clear coat with excellent resistance against dirt streak mark. It helps to keep walls cleaner and longer.



LIGHT INDUSTRIAL FLOORING

FLOOR INTERNAL	PRIMER	**Nippon Penetrative Epoxy Primer or Nippon Hycote 51WT** To be used on concrete floor to seal the porosity of concrete, provide deep penetration to enhance adhesion and re-strengthen weak concrete to prepare for polymer overlay.
	TOP COAT	**Nippon EA4 Finish** High performance coating for internal flooring, steel and glazed tiles. Provides good resistance to abrasion and mechanical damage.

INTERNAL WALL

		GOOD PERFORMANCE	HIGH PERFORMANCE	EXCELLENT PERFORMANCE
MASONRY	PRIMER	**Nippon Acrylic 5170 Wall Sealer**	**Nippon EA9 Finish HB**	
	TOP COAT	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline resistance. It is available in Gloss and Soft Matt Finish.	**Nippon EA4 Finish / Nippon EA9 Finish HB** High performance coating for wall. Provides good resistance to abrasion and mechanical damage.	**Nippon Polyurethane Recoatable Finish** High performance coating with superlative gloss. It is available in Gloss and Soft Matt Finish.
GLAZED TILES	PRIMER	**Nippon Hycote 51WT** Water thinned epoxy primer for glazed tile, glazed brickwork, powder floats concrete and cement floor. It provides excellent adhesion to different surfaces.		
	TOP COAT	**Nippon Acrylic Finish Topcoat** High performance paint with excellent alkaline and resistance. It is available in Gloss and Soft Matt Finish.	**Nippon EA4 Finish / Nippon EA9 Finish HB** High performance coating for internal steel and glazed tiles. Provides good resistance to abrasion and mechanical damage.	**Nippon Polyurethane Recoatable Finish** High performance coating with superlative gloss. It is available in Gloss and Soft Matt Finish.

EXTERNAL WALL

		GOOD PERFORMANCE	HIGH PERFORMANCE	EXCELLENT PERFORMANCE
MASONRY	PRIMER	**Nippon Acrylic 5170 Wall Sealer**	**Nippon EA9 Finish HB**	**Nippon EA9 Finish HB**
	TOP COAT	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline and weathering resistance. It is available in Gloss and Soft Matt Finish.	**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.	**Nippon Solareflect PU** Reflects heat and reduces surfaces temperature up to 5°C. *only available upon request.
	SELF-CLEANING CLEAR COAT	**Nippon CrystaCoat** Self-cleaning clear coat with excellent resistance against dirt streak mark. It helps to keep walls cleaner and longer.		
GLAZED TILES	PRIMER	**Nippon Hycote 51WT** Water thinned epoxy primer for glazed tile, glazed brickwork, powder floats concrete and cement floor. It provides excellent adhesion to different surfaces.		
	TOP COAT	**Nippon Acrylic Finish Topcoat** High performance exterior paint with excellent alkaline and weathering resistance. It is available in Gloss and Soft Matt Finish. It can also be used for internal walls.		**Nippon Polyurethane Recoatable Finish** High performance UV Resistance coating with superlative gloss and colour retention on outdoor exposure. It is available in Gloss and Soft Matt Finish.
	SELF-CLEANING CLEAR COAT	**Nippon CrystaCoat** Self-cleaning clear coat with excellent resistance against dirt streak mark. It helps to keep walls cleaner and longer.

All colour displayed are in high gloss finish. The appearance of these colours may vary, and is dependant on the product choses.

Semua warna yang ditunjukkan adalah berkemasan kilauan kilat. Kemasan semua warna adalah berlainan bergantung kepada product yang dipilih.

所有颜色显示均为高泽面。颜色将跟据所选择的产品呈现不同的光泽。

All colours shown are as close to the actual Nippon Paint Colours as modern printing techniques permit.

HIGH PERFORMANCE
PRODUCT SELECTION

HIGH GLOSS & SOFT MATT
NIPPON PAINT
PROTECTIVE COATINGS

Nippon PU Recoatable Finish

High performance UV resistance coating for bridge, transmission tower, heavy structural steelwork, masonry and concrete wall.

- For non immersion service.
- Superlative gloss and colour retention on outdoor exposure.
- Do not chalk easily.
- Available in Gloss & Soft Matt Finish.

HIGH GLOSS
NIPPON PAINT
EA-4 FINISH

Nippon EA4 Finish

High performance coating for internal flooring, steel and glazed tile.

- For use on steel and cement surfaces where chemical, oil and abrasion resistance coating is required.
- Good resistance to abrasion and mechanical damage.
- Excellent adhesion on correctly prepared and primed surfaces.
- Dry service temperature range up to 100°C.

HIGH GLOSS & SOFT MATT
NIPPON PAINT
PROTECTIVE COATINGS

Nippon Acrylic Finish Topcoat

High performance exterior paint for concrete, plastered walls and asbestos.

- Excellent alkaline and weathering resistance.
- Available in Gloss & Soft Matt Finish.
- It can also be used for internal walls.

SOFT MATT
NIPPON PAINT
EA-9 FINISH HB

Nippon EA9 Finish HB

High performance coating that provide outstanding resistance to aqueous solutions and a wide range of industrial chemicals

- Developed to achieve long corrosion protection for many types of surface i.e. aluminium, galvanising, steel and concrete.
- Excellent adhesion on correctly prepared surface.
- Good resistance to abrasion and mechanical damage.
- Food grade two pack amine-adduct cured high-build epoxy finish.

HIGH GLOSS
NIPPON PAINT
PROTECTIVE FINISH FD

Nippon Protective Finish FD

Finishing coating for steel structure and iron surfaces under non immersion condition.

- It is a finish coating based on a combination of oil modified alkyd and a special synthetic resin
- It has excellent weathering resistance

HIGH GLOSS
NIPPON PAINT
NC WOOD LACQUER

Nippon NC Wood Lacquer

NC high gloss lacquer for wood furniture & billboard industries.

- It is a fast dry nitrocellulose base high gloss enamel paint
- Easy to apply and forms a smooth, tough paint film
- Provides excellent gloss and durability
- For decoration and protection of proper primed wood and metal surfaces.

HIGH PERFORMANCE
FLOOR COATING SYSTEM

	RESIDENTIAL AREAS	COMMERCIAL BUSINESS	INDUSTRIAL
DESCRIPTOR	Transform your worn-out, new or unprotected cement or old tiles flooring into beautiful, bright, seamless & easy to maintain surfaces with multiple colours and textured finishes to fit any décor. It also creates a safe anti-slip and soft & comfort surfaces.	Protect and beautify your concrete floors into beautiful finished surface that creates cosy and safe environment for customer to visit frequently. It will withstand the frequent abuses of your particular service environment while protecting the underlying substrate from premature wear and surface damage. It can also prevent the absorption of pollutants and therefore saves you from costly maintenance and repairs.	Our Industrial floor coating provide an environmentally sustainable solution for substrate protection, lower operational and maintenance costs. We also provide various solutions to your industrial need with multiple functional needs i.e. mechanical, chemical, and thermal resistant, moisture barrier solutions and even anti-static coatings for your floor from light to heavy duty usage. Our floor coatings are hard wearing, durable and resistant to damage from everything you would expect in any wet or dry industrial working area.
IDEAL FOR	• Garage Areas • Basements • Kitchens • Bathrooms • Utility Rooms • Exterior Patios and Porches	• Retail Showrooms • Corporate areas • Shopping Centres • Airports • Reception Halls • Exhibition Areas	• Production area • Warehouse • Assembly Plants • Restrooms • Hospitals • Surgical Halls
AVAILABLE SYSTEMS	1) Solvent Free Flexible Polyurethane. 2) Coloured Flake encapsulated in solvent free epoxy. 3) Coloured Quartz encapsulated in solvent free epoxy.	1) Solvent Free Flexible Polyurethane. 2) Coloured Flake encapsulated in solvent free epoxy. 3) Coloured Quartz encapsulated in solvent free epoxy.	1) Solvent free epoxy. 2) Water-based epoxy. 3) Water-based polyurethane cement. 4) Water-based epoxy cement.
SPECIAL FEATURES	• Flexible Coatings • Decorative Coloured Quartz Finish • Decorative Flakes Finish	• Flexible Coatings • Decorative Coloured Quartz Finish • Decorative Flakes Finish	• Electrostatic Discharge (ESD) • Chemical Resistance Coatings • Anti-Slip Coatings • Anti-Microbial • Moisture Barrier • Anti-Osmosis
	Textured finish patio surface creates an aesthetically appealing and functional space.	Creates a stylish, durable, easy to clean floor surface that can match any decor and public environment.	Resistant to damage from chemicals, abrasions, and impacts. It stands up to moisture, welding spatter and equipment maintenance.

For more information, kindly contact +603 5125 0888

FOOD INDUSTRY	CAR PARKS	SPORTS FACILITIES
In today's food industry, floor coatings are of paramount concern because floor impacts the entire facility. Our floor coatings are of highest standards and help to comply with industry guidelines for good hygiene practice and efficient production such as HACCP & GMP. It is durable and thick enough to create a protective barrier that prevents contaminants from permeating concrete and wood substrates. It can withstand extreme temperatures during steam cleaning and cold storing.	Do not neglect your car parks flooring as noises from tyre-squeal and badly defined parking bays with poor light reflectant can all have an adverse effect on end-user perception in car-parks. In addition to this negative impact, unprotected car parks are prone to cracking, abrasion, damage from petrol, engine oil, and other hydrocarbons and from exposure to the elements. Our flooring coatings systems are customised to be tough on suspended and flexible substrates and rigid on static substrates. It is engineered considering different area depending on whether it is parking bays, driveways, turning circles or ramps that needs additional anti-skid properties.	It is designed with the need of every sports activity. Anti-slip textures provide grips. Soft feel gives the required comfort and also the toughness for the continuous wear and degree of hardness for the bouncing of the ball in the indoor and outdoor sports complex.
• Food processing facilities • Commercial Kitchens • Restaurants • Food Warehouses • Food storage Areas	• Basement Deck • Intermediate Deck • Roof Deck/Exposed Deck • Ramps	• Badminton Court • Tennis Court • Basketball Court
1) Water-based polyurethane cement.	1) Solvent free flexible polyurethane. 2) Solvent free epoxy.	1) Solvent free flexible polyurethane. 2) Solvent free epoxy.
• Anti-Microbial • Food Grade Coatings • Moisture Barrier	• Moisture Barrier • Anti-Skid • Anti-Osmosis	• Moisture Barrier • Anti-Skid • Anti-Osmosis
It is resistant to damage from chemicals, abrasions, and impacts. The Anti-microbial series offers a coating system that prevents micro-organisms from degrading the coating product.	Textured high gloss finish provide bright, anti-slip, noise reduction, chemical resistance flooring for a safe and comforting experience at any car park.	Provide long lasting well bonded monolithically adhered sports flooring system. Resist continuous wearing from sports activity and good resistance of salty sweat and UV .
